

LATIN AMERICAN FOCUSED GOLD PRODUCTION AND EXPLORATION COMPANY

Corporate Profile	Key Data	
<p>Orosur Mining Inc. (OMI) is a fully integrated gold producer and exploration company focused on identifying and developing gold resources in Latin America. The Company operates the San Gregorio gold mine in Uruguay, is developing the Pantanillo project in the Chilean Maricunga Belt and has assembled an exploration portfolio of high quality assets in Chile and Uruguay.</p>	<p>AIM/TSX: 12 Month Hi/Low: Share O/S: Share F/D: Cash: Debt: Market Cap:</p>	<p>OMI \$C0.69-C0.20 64,432,706 68,973,021 US\$9.4 Million Negligible C\$26 Million; £16 Million</p>

Investment Highlights

- Mid-cap established gold producer/explorer focused on expansion.
- Focused on extending mine life in Uruguay, lowering costs and accreting value from discoveries on recently acquired projects in Chile.
- Other Uruguayan exploration assets (iron ore/diamonds) under Joint Venture.
- Leverage from production growth, resource expansion and pipeline of exploration projects.

Uruguay- San Gregorio mine producing 55,000 oz pa

Chile- Pantanillo and Anillo gold projects in established gold belts

San Gregorio Mine (Northern Uruguay)

- San Gregorio District has produced in excess of 1,000,000 ounces from surface operations
- Three main pits; Arenal, San Gregorio and Santa Teresa have been mined to 200m depth
- Forecast production of + 55,000 ounces for FY2010
- Arenal Deeps M&I Resource of 2.14 Mt @ 3.61 g/t for 249,000 ounces at a 1.5g/t cutoff; expected to extend mine life, progressively reduce costs and contribute to production in FY 2011 (feasibility study underway – AMEC)
- Drilling underway to define additional underground resources at San Gregorio; focus on higher grade lenses within the existing in situ M&I resource of 8 MT at 1.04 g/t and extensions at depth.
- Near mine exploration programs targeting additional resources

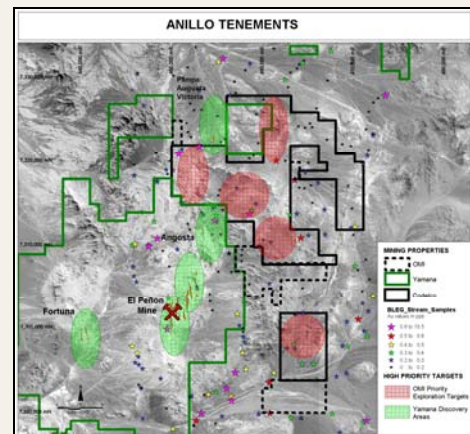

Pantaniillo Project (Maricunga Belt – Chile)

- Option to acquire 100% of the Pantaniillo project from Anglo American in the Maricunga Belt
- >15,000 meters of historical drilling on Pantaniillo Norte has defined a bulk tonnage-low grade gold deposit (Resource estimate of 2m oz Au is not currently NI 43-101 compliant)
- Resource Definition Drilling program underway (7,500m)
- Focus on oxide and mixed zones
- 43-101 compliant resource estimate anticipated by Y/E 2010
- Scoping study work has commenced with results anticipated by Y/E 2010
- Multiple targets exist on the 11,750 hectare land package.

Anillo Project (El Peñon Gold District – Chile)

- Option to acquire 65% of project from Codelco (world's largest copper company).
- Property comprises 30,600 hectares approximately 10 km north and east of Yamana's El Peñon gold silver mine (current production of >400,000 oz Aueq per annum at \$US 280-310 per oz cash cost).
- Yamana's Augusta Pampa vein is 3 km from Anillo property.
- Targeting El Penon Au+Ag style vein mineralization
 - Similar geology - rhyolite domes and veins.
 - Structural features continue north from El Penon through Anillo
 - Geochemical profile around veins similar
- Mapping, soil sampling to commence in Q3 of 2010/11 with drilling planned for 2010/11
