

Loryser Reorganisation Proceedings and Creditor Protection Sought for Uruguayan Operations; Colombian Exploration Continues Forward

MONTEVIDEO, Uruguay, June 15th, 2018. Loryser S.A. ("Loryser"), the operating subsidiary of Orosur Mining Inc. ("Orosur" or "the Company") (TSX/AIM: OMI), a South American-focused gold producer, developer and explorer announces that it has applied to commence reorganisation proceedings (the "Loryser Reorganisation Proceedings") under Uruguayan legislation (Act N°18.387).

The San Gregorio mine and processing complex has been in operation since 1997 and has produced approximately 1.5Moz of gold during this time. Since late 2017, Orosur has been hindered by operational challenges in its San Gregorio Underground Mine ("SG UG") in Uruguay. The scarcity of alternative sources of ore has made it difficult to reverse this situation which is resulting in financial liquidity constraints. To continue the mineplan, a swift and timely transition from SG UG to the Veta A underground project would be needed, which itself would require external financing and the environmental permit in Veta A which are currently not yet available.

As a result of the current circumstances, the Board of Directors has been actively exploring a number of alternatives for Orosur and its subsidiaries. The decision to apply for the Loryser Reorganisation Proceedings and creditor protection was made in consultation with the Company's legal and financial advisors and is in the best interests of Loryser, the Company and their stakeholders. This request for commencement of the Loryser Reorganization Proceedings was applied for by Loryser on June 14th, 2018, from the Reorganization Court in Montevideo (the "Court"). The Court is expected to take several days to assess whether the necessary requirements are met to declare the start of the Loryser Reorganisation Proceedings.

Orosur and its subsidiaries (excluding Loryser) are not included in the Loryser Reorganisation Proceedings and the Company's management team will continue to lead day-to-day operations.

Loryser expects to continue production at SG UG until the end of July after which it intends to place the mine in care and maintenance. Loryser will remain able to enter into transactions with its suite of Uruguayan assets. Through the course of its operations in Uruguay, the Company has been fortunate to have enjoyed a very positive relationship with the Government and even received two royalty exemptions in recent years. Orosur is currently conducting conversations with the Government to analyse different options to continue its operations in Uruguay, which represent a very important source of investment and employment in the north of the country.

The Company plans to continue to advance its Colombian gold exploration program and believes that the Loryser Reorganisation is the best option by which to return Orosur to a stable situation while focusing its efforts on unlocking the value of its exciting Colombian gold exploration asset. As of June 14th, 2018, excluding Loryser assets and liabilities, the Company had total cash and cash equivalents of US\$174,000 and zero financial debts.

Ignacio Salazar, CEO of Orosur, said:

"The decision to commence the Loryser Reorganisation Proceedings is a strategic one that we believe will best protect our business and preserve cash while we endeavour to achieve the best possible outcome for our Company, employees, suppliers, other business partners and stakeholders. By commencing the Loryser Reorganization Proceedings, the Company preserves its ability to enter into any number of potential transactions which may be beneficial to our stakeholders.

We intend to treat all our stakeholders with the utmost respect and care through the Loryser Reorganisation Proceedings process with every intention of arriving at a fair and balanced plan in a swift time period while allowing the Company to continue advancing its Anzá project in Colombia."
